

Julian Karlbauer M.Sc.

Personal Website: <https://jkarlbauer.github.io> | eMail: juliankarlbauer@gmail.com | [LinkedIn](#) | [GitHub](#)

Applied Researcher & Engineer. My research interests lie at the intersection of spatial computing, digital fabrication, and intelligent interactive systems, with a focus on empowering and augmenting human abilities through an applied, interdisciplinary approach. Expert in XR Software Engineering, and building robust research prototypes for industrial scale, with experience at Siemens, Audi, and Silicon Valley startups.

EDUCATION

Ulm University M. Sc. in Media Informatics Ulm, Germany (10/2020 – 03/2024)

Thesis Title: *“Show, Don’t Tell: Enhancing Quality Assurance in Additive Manufacturing through Augmented Reality”* (Thesis Grade: 1.0; Overall Grade: 1.2 - A-equivalent) - ([thesis](#))

NTNU Visiting Student in Natural Language Technology Trondheim, Norway (07/2021 – 12/2021)

Thesis Title: *“Raw Audio Music Emotion Composition using Mood Annotated Spotify Playlists”*

Notes: Norwegian master’s thesis equivalent; supported by Erasmus Stipend

(Thesis Grade: 1.0; Overall Grade: 1.0 - A-equivalent) - ([thesis](#))

Ulm University B. Sc. in Media Informatics Ulm, Germany (04/2016 – 07/2020)

Thesis Title: *“An Exploration of Foveated Blue Light Filters in Virtual Reality”*

(Thesis Grade: 1.0 - A-equivalent) - ([thesis](#))

EXPERIENCE

Sabbatical Independent Projects Latin America, Middle East, Europe, Asia (06/2025 – present)

Planned sabbatical dedicated to cross-cultural engagement, journalistic work, independent projects, and refinement of long-term research objectives.

Phygtl Inc. Founding Engineer Palo Alto, USA (remote) (12/2024 – 06/2025)

Held an equity-based founding role in an XR startup dedicated to bridging physical and digital spaces through collaborative social AR experiences and enabling Generative AI-based 3D co-creation. Responsible for the XR components of the [Vyry](#) platform: software architecture design, close collaboration with the executive team (CEO, CTO) to define the technical roadmap, leading code quality assurance, and making substantial contributions to the core codebase.

Ulm University Research Associate Ulm, Germany (01/2024 – 10/2024)

Worked as a Research Associate under Prof. Dr. Enrico Rukzio in the field of Personal Fabrication. My research investigated Generative AI-assisted 3D authoring in Augmented Reality to support digital manufacturing workflows. Demoed a [prototype](#) enabling generative 3D content creation from multimodal real-world input at ACM SCF. Additionally, participated in the [ACM SCF Summer School](#) and co-authored a paper at ACM MUM.

Siemens Master’s Thesis Student Munich, Germany (04/2023 – 11/2023)

Conducted my Master’s thesis at the Siemens Department of Additive Manufacturing and Materials on data-driven quality assurance in industrial wire-arc additive manufacturing (WAAM) processes using Digital Twins and Augmented Reality interfaces. Designed, developed, and evaluated an [AR interface](#) enabling interactive in-situ visualization of CAD data and spatio-temporal anomaly predictions. The prototype received strong institutional validation at Siemens and was selected as a potential showcase for executive leadership and presentation at Formnext.

Audi Software Engineering Intern Ingolstadt, Germany (03/2022 – 09/2022)

Interned at the [Audi Production Lab](#). Responsible for developing a mobile, distributed, and cross-device Mixed Reality platform for collaborative communication on 3D Digital Twin data. Led iOS-directed Unity3D development and interaction design, and supported the design and execution of interviews and user studies. My role also involved evaluating mobile GPU performance by designing dedicated hardware stress tests and developing custom tools for Unity package management.

TriCAT GmbH R&D Intern Ulm, Germany (03/2021 – 06/2021)

Proposed and developed a machine vision research prototype for in-situ, real-time object recognition and 3D localization on HoloLens 2. Implemented manually fine-tuned CNNs and leveraged environment meshes

within a compute-efficient remote GPU architecture. Pioneered the application of deep learning for solving customer challenges within the company.

Ulm University Research Assistant

Ulm, Germany (04/2018 – 03/2021)

Significantly contributed to research published at ACM CHI and in ACM ToCHI. My role involved leading the development of XR research prototypes, synthesizing key research findings, collaboratively shaping the narrative of publications, teaching activities, and designing and conducting user studies.

ACADEMIC SERVICES

Conference Reviewer CHI (2025)

Student volunteer at ACM SCF conference (2024)

SKILLS

- Highly independent, self-motivated, and solution-oriented
- Software Engineering: Agile development principles; OOP Design Patterns
- Coding: C# (especially Unity3D), Python + TensorFlow (Neural Networks), JavaScript, Java
- Languages: German (native), English (fluent), French (B2), Spanish (A1), Swedish (A1)
- Creative and artistic background in composition and performing on classical guitar

TEACHING

Exercise Lectures on Computer-Human-Interaction (Ulm University, 2020)

Student Project Mentorship (Ulm University, 2024)

SOFTWARE (Selection)

xrTinkr: Unity tool for algorithmically generating timber frames for Tiny House concepts from given meta information – [GitHub](#), [YouTube](#)

maconiaAR: research prototype exhibited at GISEC 2025

HelpingHands: experiments on hand Tracking on Meta Quest 2. > 2500 downloads on [SideQuest](#) App Store
